

Sketch: Other

The last section of the sketch is called “Other.”

The “other” category can be used to include any type of information. It could show how you are well-rounded. University of Ottawa will use this section at the interview stage. On the screen are some ideas of what to include in this section.

This is a screen shot of the Other category. There is only a top layer, so you don’t have an opportunity to provide more details. There are 48 characters for the description only and you need to include the verifier number at this level.
