

## **Student Scenario 5 Transcript**

1

00:00:04,440 --> 00:00:06,360

Unknown: An international student is working for a

2

00:00:06,360 --> 00:00:09,360

Canadian construction company, and has asked the company before

3

00:00:09,360 --> 00:00:11,910

the term if there was any initial training he needed to

4

00:00:11,910 --> 00:00:15,060

complete before they did their work, as he wanted to make sure

5

00:00:15,060 --> 00:00:18,150

he understood everything about the job, as he's not familiar

6

00:00:18,150 --> 00:00:22,080

with Canadian workplace training

and safety. The company shared

7

00:00:22,080 --> 00:00:24,450

that there was no training he  
needed to complete before he

8

00:00:24,450 --> 00:00:27,780

started work. The international  
student nodded and began

9

00:00:27,780 --> 00:00:30,210

chatting with the supervisor  
about what they would be working

10

00:00:30,210 --> 00:00:33,450

on. During their second work  
week, the international student

11

00:00:33,450 --> 00:00:35,850

was told that they would be  
working on a two storey office

12

00:00:35,850 --> 00:00:39,510

building. He went to the job  
site and began to fasten himself

13

00:00:39,510 --> 00:00:43,560  
into the safety harness, but the  
harness was not secure. As he is

14

00:00:43,560 --> 00:00:46,680  
been lowered to work on the  
building, the harness unfastens,

15

00:00:46,740 --> 00:00:49,830  
and he falls to the ground,  
breaking his arm and injuring

16

00:00:49,830 --> 00:00:53,790  
his legs. The student is then  
transported to the hospital and

17

00:00:53,790 --> 00:00:57,240  
is waiting to meet with a  
doctor. The student frowns in

18

00:00:57,240 --> 00:01:01,050

disappointment. The student  
feels embarrassed and ignorant

19

00:01:01,080 --> 00:01:04,350

for not knowing how to properly  
fasten a harness, but realized

20

00:01:04,350 --> 00:01:07,320

that training would have been  
super helpful for this. He is

21

00:01:07,320 --> 00:01:09,720

scared about risking his  
immigration status as an

22

00:01:09,720 --> 00:01:14,730

international student. The  
student meets with a doctor. The

23

00:01:14,730 --> 00:01:17,610

doctor shares that he will be  
fine, but will need to focus on

24

00:01:17,610 --> 00:01:22,620

rest and recovery. The student expresses his thanks. The

25

00:01:22,620 --> 00:01:25,860

student is unsure of whom to speak to about his recovery, but

26

00:01:25,860 --> 00:01:29,310

decides to reach out to his student advisor. His student

27

00:01:29,310 --> 00:01:32,280

advisor shared that he should just focus on his recovery, and

28

00:01:32,280 --> 00:01:35,010

when he's feeling up to it, they can chat about what happened and

29

00:01:35,010 --> 00:01:37,770

what the employer needs to do in the future to create a safe

30

00:01:37,770 --> 00:01:42,060

place for students to work. The student advisor also suggested

31

00:01:42,060 --> 00:01:45,060

reaching out to immigration consulting to ensure everything

32

00:01:45,060 --> 00:01:49,170

with his status is okay. After speaking to his student advisor,

33

00:01:49,200 --> 00:01:51,900

he felt some relief, and understood that there were many

34

00:01:51,900 --> 00:01:53,670

people to support him if needed.
